$SODO SCOOBY DOO WHITEPAPER

Introduction

Currently, Scooby Doo ($SODO) - is a meme token based on the Ethereum blockchain, but we will be announcing much more in the future (unexpected exchange listings, own dex launch, Blockchain gaming platform launch, and much more). The Doge Season is not over, it is just beginning, and Scooby is once again kicking off the Doge Season.
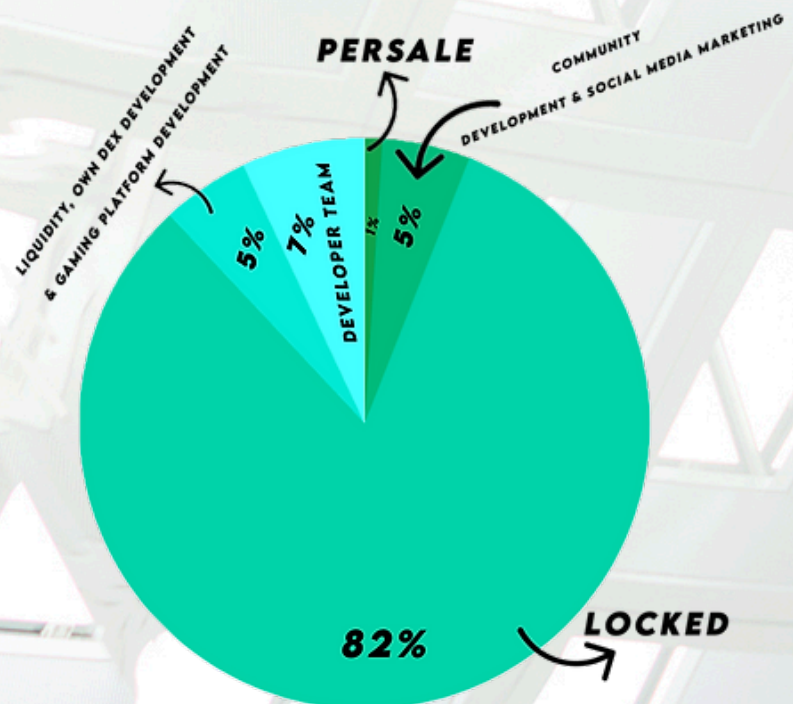

As an overview though our project, Scooby Doo, is a blockchain-based platform that will revolutionize the way we interact with money and gaming. With Scooby Doo, you will be able to send and receive money instantly, securely, and at minimal cost. You will also be able to access in game upgrades and characters by using our native token $SODO

Technology

Scooby Doo is built on top of the Ethereum blockchain. Ethereum is a decentralized open-source blockchain system that features smart contract functionality. Smart contracts are self-executing contracts that are stored on the blockchain. They can be used to automate transactions and agreements.

Team

The Scooby Doo team is composed of experienced professionals with a proven track record in the blockchain industry. We have a strong team of developers, engineers, and marketers who are committed to building the best possible platform for our users.

Roadmap

Our roadmap is ambitious, but we believe that it is achievable. In the short term, we plan to launch our platform and begin onboarding users. In the long term, we plan to expand our platform and offer a wider range of gaming and financial services.
